

Job Description

Position

Early Childhood Teacher

General Description

Dhirubhai Ambani International School is looking at opening an Early Childhood Center in the second half of 2023 which will be located in the Bandra Kurla Complex, Mumbai, India.

We provide a strong educational foundation for young children, ages 15 months to 4 years old focusing on the whole child in areas such as social, emotional, physical, and cognitive development.

Our center will offer transitional learning environments based on a Reggio Emilia inspired setting on the foundation of a PYP curriculum and incorporating elements of international Early Childhood best practices. The environment will encompass free movement between indoor and outdoor learning spaces, extensive outdoor playgrounds, an organic garden, a butterfly garden and mini zoo, STEM (Science, Technology Engineering, Mathematics) studio, dramatic play, music, movement, light and shadow study, ateliers that inspire process art, and a central piazza to explore language and literacy through community work.

We believe that every child needs a positive environment in which to learn, grow, and develop, and in a setting that inspires creativity and imagination. We provide them with the individual care they need to flourish and help them to find their voice and feel confident expressing themselves. They will be encouraged to rise to challenges with determination, perseverance and, most importantly, a smile on their faces.

Children in our centre are given specialized attention and resources to enhance their educational journey. Each child is seen as their own unique person, and we work to foster an educational environment where children are free to be themselves and learn with compassion, curiosity, and innovation.

Qualifications and Requirements

Educators with a background in early childhood practices that encompass an Emergent Curriculum. They are ongoing researchers who have evolved into being lifelong learners who consistently remain educated and informed in forward thinking pedagogical practices as well as the ability to embrace new challenges which is constant as they adapt their teaching to the interests of their children.
